## **4.1.2. The Institution has adequate infrastructure and physical facilities for teaching-learning. Viz, Classrooms, Laboratories, Computing Equipment etc.**

Rizvi Education society's Rizvi Law college focuses on student-centred learning through opening new avenues and initiating challenging courses to meet the requirements of the students. Taking into consideration the natural growth of the existing courses and getting opportunities to start new divisions / courses each year, infrastructural requirements are well estimated and planned and are put forth to the management. Approved infrastructural requirements are included in the budget. This procedure has helped us to improve the state of infrastructure from time to time. Now, the College has well-furnished classrooms equipped with LED lights and marker pen boards, a spacious air-conditioned library with a good collection of resources and a Mock Moot Court Room that facilitate effective teaching and learning. Wi-Fi connectivity is provided in the office. Addition, expansion and renovation of classrooms, staff rooms, store rooms, laboratories and conference room are carried out during the vacations to avoid disturbance during lectures. Infrastructure is important for college because it provides students with access to the greatest resources and amenities that may make them feel respected, comfortable, and safe. The college takes due permission from the sister colleges functioning in the same campus building for using classrooms of other sections and conducts lectures as and when required.

The institution has an aesthetically pleasing campus with well-planned buildings, rectangle roadways, avenue plants, rich green lawns, fresh breezes, and buildings with thoughtful architectural design. There are protective walls all around, a security guard at the gate to prevent unauthorized entry, and CCTVs that are constantly in place to ensure that everyone feels appreciated and protected when they enter the college grounds.

The physical facilities and infrastructure of the society are designed in accordance with the student's ratio enrolled per year. There is total 14 classrooms. Some classrooms have ICT facilities and air conditioning and some classrooms are equipped with fans considering the college being in close proximity to the sea coast, there is constant air circulation and pleasant climate.

In the ICT era of education, management is eager to use computers for computer-based learning and education. For this reason, colleges have approximately 120 computers. The process of teaching and learning is facilitated by a well-maintained administrative physical structure-wise and knowledge resource wise library. It is to store the knowledge and transfer the knowledge years together.

Our college has the necessary infrastructure and facilities to host cultural, sporting, and other activities. Our college offers a well-equipped yoga room to enhance mental health, increase physical fitness, and allow students to participate in sports and games. The College has space for both indoor and outdoor games (approximately 700 to 800 sq. ft). The College also features an auditorium (about 794 sq. ft) that is used for seminars, cultural activities, workshops, and other events. In addition to the Auditorium, the College has a Seminar Hall / conference hall (sq. ft.). The administrative section consists of the director's and Respected Principal's cabins as well. Highlight features include Seminar room, conference hall, cultural area, and hygienic canteen. A notable feature of the campus's infrastructure is the presence of both a boys' and girls' hostel.
