6) Environmental Policy:

Environmental Law Policy of Rizvi education Society's Rizvi College of law is a transdisciplinary discourse that draws from a variety of disciplines, such as Constitutional Law, International Law, Tort Law, Criminal Law, Human Rights, Environmental Economics, this body of law encompasses almost every conceivable discipline, making it a comprehensive and holistic approach to environmental issues. The three basic ideals that define this body of law are: (i) the rejection of the "Business as Usual" model; (ii) a firm belief in environmentally sustainable development; and (iii) a commitment to making the system work and acting as a catalyst for an environmentally just legal order. In the B.LS./LL.B & LL.B program, Environmental Law and Policy is a core course that is mandatory for all students. It serves as a logical continuation of the Natural Resource Management Course (Land Laws). Given that environmental law incorporates various disciplines within and outside of law, this course adopts a transdisciplinary approach to provide students with a comprehensive understanding of its context and rationale. Building upon the foundation of natural resource management, this course will delve directly into the fundamental norms of environmental governance. While the primary focus will be on Indian policy and law, international influences and practices will also be explored within the course. Against the backdrop of the environmental crisis and the global evaluation of India's environmental performance, the course begins with an exploration of the basic theories of environmental management.

Additionally, there will be discussions on eco-sensitive zones and coastal area management. The course emphasizes the importance of environmental justice and its implementation at various levels. By examining both theoretical concepts and practical skills, students will be equipped with the necessary tools and knowledge for this specialized area of law and practice. To enhance the practical dimension of the course, climate law and litigation will also be discussed.

The teaching method for this course, which is conducted offline, involves initiating reflections on various predetermined topics using tools such as PowerPoint presentations and short video clips. Towards the end of each lecture, students are encouraged to participate in discussions and interact with the material. Select students will also be assigned project topics to stimulate further engagement and strategic interventions.

The course aims to provide students with both theoretical understanding and practical skills necessary to apply environmental law in real-world situations.
